**S. Smith, Mr P Stronach, P. Stronach : Builders' Detail Sheets (Builders' Bookshelf)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Builders' Detail Sheets (Builders' Bookshelf):

This book contains a unique set of information sheets, covering all aspects of building from sit setting-out to roofs and floors. It gives builders and students of building a sound knowledge of materials, their properties and limitations, and shows the practice of using these materials for sound construction. The sheets also give information on the Building

Regulations and how to comply with them.
