**From Taylor Francis : Building Mycology: Management of Decay and Health in Buildings** before purchasing it in order to gage whether or not it would be worth my time, and all praised Building Mycology: Management of Decay and Health in Buildings:

Biodeterioration is the most common problem of mankind and its record can be traced back to biblical times or probably earlier. Building Mycology deals with the study of fungi in and around the building environment, having

direct and indirect effect on the health of the building, its materials, structures and occupants.
