**Roger Greeno : Building Services, Technology and Design (Chartered Institute of Building)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Building Services, Technology and Design (Chartered Institute of Building):

Building Services, Technology and Design provides a concise guide to the installation and design of principal services in domestic and commercial buildings. It covers the level 2 module of The CIOB's Education Framework and is officially sanctioned by the CIOB as the recognised text for that module. The book combines theory, design and application in one volume and is supported throughout with illustrations, design examples, tables and charts. Services covered include: cold and hot water; heating; ventilation; air conditioning; gas; electricity; security; fire control;

sanitation; drainage and transport systems. *Building Services, Technology and Design* is a core text for the CIOB level 2 module, as well as BTEC HNC/D building studies and degree courses in building. It is also an essential reference for all members of the facilities management and construction industry.

**About the Author** Roger Greeno is a consultant, examiner and established author of many construction papers and publications, with extensive experience in further and higher education; he formerly lectured at the University of Portsmouth.
