**Paul Oliver : Built to Meet Needs: Cultural Issues in Vernacular Architecture** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Built to Meet Needs: Cultural Issues in Vernacular Architecture:

The study of vernacular architecture explores the characteristics of domestic buildings in particular regions or localities, and the many social and cultural factors that have contributed to their evolution. In this book, vernacular architecture specialist Paul Oliver brings together a wealth of information that spans over two decades, and the whole globe. Some previously unpublished papers, as well as those only available in hard to find conference proceedings, are brought together in one volume to form a fascinating reference for students and professional architects, as well as all

those involved with planning housing schemes in their home countries and overseas.
