Joseph Leo Koerner : Caspar David Friedrich and the Subject of Landscape, Second Edition before purchasing it in order to gauge whether or not it would be worth my time, and all praised Caspar David Friedrich and the Subject of Landscape, Second Edition:

5 of 5 people found the following review helpful. An excellent book on the life and times of Caspar David Friedrich By Yural Bayet An excellent book that is filled with many color and black and white illustrations of Caspar David

Friedrich's work and a fascinating and detailed text on the life and world of Friedrich and the country and times he lived in. The political, military and religious events of his time are discussed in relation to many of Friedrich's most famous paintings. It is not a fast read and that is a compliment because each page has so much thoughtful information on it that I find myself stopping to carefully consider what I have just read. If you really want to know about the life and work of Friedrich I recommend you buy this book. 7 of 7 people found the following review helpful. masterful work of art history By Gunning, Tom Extraordinary work of scholarship and criticism, not only placing Friedrich in the context of German Romanticism, but revealing how the very structure of his paintings reveal this connection. One of the finest works of art history I have read 6 of 6 people found the following review helpful. Great book By GenisClever and rich. I love illustrations too, but the text is outstanding. This is a gem in the dry art history field.

Caspar David Friedrich (1774–1840), the greatest painter of the Romantic movement in Germany, was perhaps Europe's first truly modern artist. His melancholy landscapes, often peopled by lonely wanderers, represent experiments towards a radically subjective art, one in which, as Friedrich wrote, the painter depicts not 'what he sees before him, but what he sees within him.' Yet in their awesome power to capture the individuality of visible forms Friedrich's pictures also accept and express the irredeemable otherness of Nature. Winner of the 1992 Mitchell Prize for the History of Art, this compelling and highly original book is now made available in a compact pocket format. Beautifully illustrated, Caspar David Friedrich and the Subject of Landscape is the most comprehensive account ever published in English on this most fascinating of nineteenth-century masters.
