Crawford : Dilmun Temple At Saar (Saar excavation reports / London-Bahrain Archaeological Expedition)

before purchasing it in order to gage whether or not it would be worth my time, and all praised Dilmun Temple At Saar (Saar excavation reports / London-Bahrain Archaeological Expedition):

3 of 3 people found the following review helpful. An example of publishing excellence!By The Reviewer Formerly Known as Kurt JohnsonThis book, first published in 1997, brings the reader almost completely up to date on what is known about ancient Dilmun. It begins with a chapter describing what is known about Dilmun in general, and Saar in particular. Then the book reports on the temple itself, followed by chapters dealing with what was found within the temple. Along the way, there is a great deal of information on stamp seals and sealing, including a catalogue of seals and sealings, and information on a whole host of other topics. Included are many excellent black-and-white and color(!) photographs, illustrations and maps.This book is an example of publishing excellence! It is highly informative,

wonderfully laid out, and beautifully illustrated. I found the catalogue of seals and sealing, which often included photographs and clear renderings, to be absolutely fascinating, something I have not seen anywhere else. So, if you are interested in ancient Dilmun, or even Mesopotamia, then you must get this book! I give it my highest rating.

First published in 1997. Routledge is an imprint of Taylor Francis, an informa company.
