**From Routledge : Dispute Resolution and Conflict Management in Construction: An International Perspective** before purchasing it in order to gage whether or not it would be worth my time, and all praised Dispute Resolution and Conflict Management in Construction: An International Perspective:

Many construction conflicts and disputes are not limited to particular jurisdictions or cultures, but are increasingly

becoming common across the industry worldwide. This book is an invaluable guide to international construction law, written by a team of experts and focusing on the following national systems: Australia, Canada, China, England and Wales, Estonia, Hong Kong, Iraq, Ireland, Italy, Japan, Malaysia, the Netherlands, Oman, Portugal, Quebec, Romania, Scotland, Sweden, Switzerland, and the USA. The book provides a consistent and rigorous analysis of each national system as well as the necessary tools for managing conflict and resolving disputes on construction projects.

This book provides information for students and practitioners of construction who need a global perspective on one of the hottest topics of the day. Unlike many hot topics, it is not likely to cool quickly - CSM
