They said it didn't have enough steps to complete the drawings.1 of 1 people found the following review helpful. Students love to draw!By Kathleen LotzI used this both as an art teacher and as a reading teacher. Boys love to draw sports/action figures. In art, they need to really see and notice detail, and they have to persevere until they get it right. In reading, they have to do the art skills, and follow directions. Since it's non-fiction, it fits in with today's education trends. Kids love to draw whether they're in art class or reading class, and how

special is it to be able to use this as a reading teacher? Your male students will love you.0 of 0 people found the following review helpful. Needs an UpdateBy BrianDrawings are too small to be seen clearly, and the amount of detail is minimal. I have a number of Draw 50 books, but have to say this is one to skip, unless dated material and minimal detail works for you.

Favorite athletes from sports such as baseball, basketball, football, tennis, skiing, gymnastics and track-and-field are presented here. An American Bookseller Pick of the Lists, New York Public Library -- Books for the Teen Age.From the Trade Paperback edition.

About the AuthorLEE J. AMES began his career at Walt Disney Studios and taught at the School of Visual Arts in New York City and at Dowling College on Long Island. He directed his own advertising agency and has illustrated over 150 books, ranging from preschool picture books to postgraduate texts. A prolific author of more than 30 Draw 50 books, Lee Ames died at the age of 90 in June 2011.Excerpt. copy; Reprinted by permission. All rights reserved.This book of 50 athletes will show you a method of drawing the human figure, of searching out the basic simple forms and lightly building one on the other. When these forms add up to a complete figure, drawn very lightly u of this point, the drawing is finished with firm, dark lines.
