First thou I will use them to bone up on drawing these animals myself.These really are only guides to assist in drawing. you should not feel that you have to follow each step. As many of the animals are in so many different positions, the book is a great assist in

developing techniques in working with perspective.0 of 0 people found the following review helpful. Rawr goes the dinosaur!By Redhouse7I bought this for my nephew for Christmas and he loves it! The step by step instructions are easy to follow and the results are great. Not only does it help you draw these dinosaurs, but you can use the lessons in the book to learn how to draw lots of things. Perfect for your young artist.0 of 0 people found the following review helpful. My kid likes it a lot.By Cool GuyMy 7 year old kid loves this. A big thanks from her. He has since led a career as an advertising artist, fine artist, cartoonist, designer, animation in-betweener, illustrator, and as an artist-in residence at Doubleday. His series of 26 Draw 50... books take a friendly and minimalist approach to teaching drawing while the books often contain no instructional text. Contemporary methods of art instruction (freedom of expression, experimentation, self-evaluation of competence and growth) provide a vigorous, fresh-air approach for which we must all be grateful...The use of this book should be available to anyone who wants to try another way of flapping his wings. Perhaps he will then get off the ground when his friend says, "David can draw a dinosaur better than anybody else!"
