The book starts off by immediately jumping into determining light values in different forms. What? I haven't even drawn a square yet, and you're asking

me to shade a coffee mug in different forms with almost no instruction?The book is broken into mini examples that you are supposed to mimic, however even the very first example require previous drawing knowledge and experience. But rather than talk about it, I've attached a photo of the steps 3 and 4 (out of 4 total steps, although step 1 technically isn't a step) of the 5th mini example (out of like 30) you are supposed to follow. 61 of 61 people found the following review helpful. NOT for beginners!!!By BoriasEven an intermediate student, in an art class, would struggle with this text. You are not given clear instructions, you are just given expertly rendered pictures that if you are a beginner you have no chance at all of duplicating. I should have known it was a loser when it started out teaching you to draw a coffee cup without telling you you should have a coffee cup in front of you to draw. You were meant to just follow their exceedingly difficult instructions that leave you frustrated, demoralized, and ready to put down your pencil forever. Shame on these people for putting this book out, just to make themselves feel like hot shot artists and leave the rest of us in the dust. I'm an absolute beginner, I believe I can learn to draw, but not with this poorly done book. To say it is for absolute beginners and the title is misleading to the point of being false advertising. I feel cheated. These people are dishonest. I wish them well in their Rembrandt quality art that no beginner has a prayer of duplicating. 2 of 2 people found the following review helpful. this is one of the best I've ever seenBy Audrey RinkerOrdered this book in combination with other drawing tools and paper as a gift. For a beginner book on drawing, this is one of the best I've ever seen. It's very easy to understand and loved all the pictures showing step by step directions. This was a great buy.
