This book's cover is a little dull but don't let that put you off. I have so many mosaic books but this is now one of my favourites. The Author comes across as a really warm, modest person, constantly creating and then critiquing her work as she pushes on to perfect her chosen craft. She has a wealth of experience and is happy to share it in a really accessible and self-effacing way. Her message is 'have a go and don't worry about making mistakes'. I enjoy making mosaics from bits and pieces from charity shops so this book is particularly appealing to me. She offers some really good practical hints which I haven't found in other books. I am really happy with my purchase

own multiple mosaic books and this is my least favorite. It says "found objects", but nearly all the projects are made of broken ceramic or china. I wanted to see mosaic with corks, keys, washers, plastic caps, minerals, etc. Nope.

This was for my sister. It's great.

Make mosaics on any surface--mirrors, tables, chairs, picture frames, bowls, switch plate covers, wooden shoes, and more.
