**BHR Group Ltd : Management and Engineering of Fire Safety and Loss Prevention: Onshore and offshore** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Management and Engineering of Fire Safety and Loss Prevention: Onshore and offshore:

The papers presented deal with the general methods and techniques, from a range of disciplines, as they can be applied to specific engineering and fire safety situations. The circumstances described include a variety of large scale plant applications in the petrochemical industry. As such this book is a valuable reference for fire engineers, petroleum

engineers and legislators working in today's multi-disciplinary design engineering team. These proceedings address five major areas of importance on and offshore: risk assessment, operations and operational safety, research, risk reduction and design safety, detection and control, and protective systems.
