**From Springer : MATHKNOW: Mathematics, Applied Science and Real Life: 3 (MSA)** before purchasing it in order to gage whether or not it would be worth my time, and all praised MATHKNOW: Mathematics, Applied Science and Real Life: 3 (MSA):

Mathematics forms bridges between knowledge, tradition, and contemporary life.The continuous development and

growth of its many branches, both classical and modern, permeates and fertilizes all aspects of applied science and technology, and so has a vital impact on our modern society. The book will focus on these aspects and will benefit from the contribution of several world-famous scientists from mathematics and related sciences, such as: Ralph Abraham, Andrew Crumey, Peter Markowich, Claudio Procesi, Clive Ruggles, Ismail Serageldin, Amin Shokrollahi, Tobias Wallisser.

From the Back Cover Mathematics forms bridges between knowledge, tradition, and contemporary life. The continuous development and growth of its many branches, both classical and modern, permeates and fertilizes all aspects of applied science and technology, and so has a vital impact on our modern society. The book will focus on these aspects and will benefit from the contribution of several world-famous scientists from mathematics and related sciences.
