Roger Rosewell : Medieval Wall Paintings (Shire Library) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Medieval Wall Paintings (Shire Library):

The medieval wall paintings that remain in English churches are for the most part shadows of their former selves — the rare fragments of this beautiful art to have survived not only the Reformation but also successive waves of iconoclastic zeal and unsympathetic restoration. The whitewashed walls of most parish churches belie the riot of colour and decoration that once adorned them, but the remnants of paintings tucked into corners or rescued from later layers of paint help us to understand the role of art in medieval religion. Roger Rosewell here offers a guide to the role

played by medieval wall paintings, as religious, didactic and commemorative works of art, telling the stories of those who created them and those who used them on a daily basis. He also compares and contrasts religious and domestic wall paintings, using beautiful colour photography throughout.

It explains why they were made, the subjects they showed, how painters created them, and their relationship with other arts. It also describes what triggered their destruction, what replaced them, and the efforts of modern day conservators to save them for future generations. A separate chapter discusses domestic wall paintings of the period. A Guide to Further Reading and a Gazetteer of places where interesting examples of wall paintings can be seen is also included.
