**From Routledge : The New Global Frontier: Urbanization, Poverty and Environment in the 21st Century**  
before purchasing it in order to gauge whether or not it would be worth my time, and all praised The New Global Frontier: Urbanization, Poverty and Environment in the 21st Century:

0 of 0 people found the following review helpful. Required for school By David Garcia Rented the digital book and it was great and easy to use. I only used it for school and not for personal reasons. It had good information that was

informative.

The world's developing countries will be experiencing massive increases in their urban populations over the 21st century. If managed intelligently and humanely, this growth can pave the way to sustainable development; otherwise, it will favour higher levels of poverty and environmental stress. The outcome depends on decisions being made now. The principal theme that runs through this volume is the need to transform urbanization into a positive force for development. Part I of this book reviews the demography of the urban transition, stressing the importance of beneficial rural-urban connections and challenging commonly held misconceptions. Part II asks how urban housing, land and service provision can be improved in the face of rapid urban expansion, drawing lessons from experiences around the world. Part III analyses the challenges and opportunities that urbanization presents for improving living environments and reducing pressures on local and global ecosystems. These social and environmental challenges must be met in the context of fast-changing demographic circumstances; Part IV explores the range of opportunities that these transformations represent. These challenges and opportunities vary greatly across Africa, Asia and Latin America, as detailed in Part V. Published with IIED and UNFPA
