Osamu A. Wakita, Richard M. Linde, Nagy R. Bakhoun : The Professional Practice of Architectural Working Drawings before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Professional Practice of Architectural Working Drawings:

1 of 1 people found the following review helpful. Excellent Guide for an architectural enthusiast learning to create Construction Documents By Andy Rode Lots of example drawings and clearly written text for every step of the process. A very useful book... whether or not you use Building Information Modeling software. 0 of 0 people found the following review helpful. Five Stars By Thomas Thanks 1 of 1 people found the following review helpful. Five Stars By JC This is a must have for any recent architecture school grad.

The practical, comprehensive handbook for creating effective architectural drawings In one beautifully illustrated volume, The Professional Practice of Architectural Working Drawings, Fourth Edition presents the complete range of

skills, concepts, principles, and applications that are needed to create a full set of architectural working drawings. Chapters proceed logically through each stage of development, beginning with site and floor plans and progressing to building sections, elevations, and additional drawings. Inside, you'll find: Coverage of the latest BIM technologies Environmental and human design considerations Supplemental step-by-step instructions for complex chapters Five case studies, including two that are new to this edition Hundreds of computer-generated drawings and photographs, including BIM models, three-dimensional models, and full-size buildings shown in virtual space Checklists similar to those used in architectural offices Tips and strategies for complete development of construction documents, from schematic design to construction administration With an emphasis on sustainability throughout, this new edition of *The Professional Practice of Architectural Working Drawings* is an invaluable book for students in architecture, construction, engineering, interior design, and environmental design programs, as well as professionals in these fields.

About the Author Osamu A. Wakita, Hon. AIA, is a retired professor of architecture and former department chair of architecture at Los Angeles Harbor College. He has been involved in architectural education since 1958. He is a recipient of the California Council of the American Institute of Architects' prestigious Outstanding Architectural Educators Award and is listed in the Council's General Reference as one of the leading authorities in perspective drawing. Nagy R. Bakhom is a licensed architect and principal of Obelisk Architects, Inc., in Torrance, California. He has provided architectural services internationally and throughout the state in which he is licensed to practice. He is an authority on high-end residential housing and commercial projects. He has been involved in architectural education since 1996, and is also a Professor of Architecture in the Los Angeles Community College District system. The late Richard M. Linde, AIA, was a licensed architect and President of the American Institute of Architects.
